ux designer & developer

EXPERIENCE

user interface designer

TeleTracking Technologies, October 2017 - Present

Design and develop user interfaces for patient flow automation software.
Code high-fidelity prototypes of UI components to set examples for developers.
Serve as a communications liaison between UX and technology teams.

user experience lead

Diverse Computing, May 2015 - October 2017

Designed responsive web applications that thousands of law enforcement officers rely on every day to find and update criminal records.
Advocated best UX practices at each step of the development process.
Developed user interfaces using Angular2 as a member of agile dev teams.
Spearheaded company rebranding efforts, crafting DCI's logo and style guide.
Established value in assistant-level position and ascended to leadership role.

communications director

The Tallahassee Ballet, October 2014 - August 2017

Managed the ballet's website, social media presence, internet advertising, press, email marketing, and community relationships.
Promoted from administrative role after demonstrating diligence and skill.

graphic designer

JH Creative, May 2015 - 2016

Crafted brand strategies, websites, and print collateral for JH Creative's clients.

artist collective manager

Thomasville Center for the Arts, August 2012 - September 2014

Assisted in curating and hanging exhibitions, and planning openings.
Created and executed program plans for budget, marketing, and social media.
